

Zephyr Lock

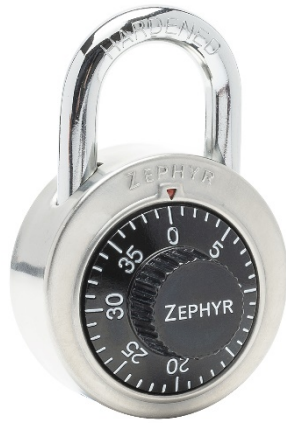

BETTER SECURITY THROUGH INNOVATION

Model 1902 /1925

Combination padlock with anti-shim feature

This combination padlock is the go-to lock for schools and universities. The stainless-steel body provides greater security and durability to help protect personal belongings. Approved by all locker manufacturers, this lock is an incredibly durable, easy-to-use, and cost-effective locking solution for virtually all lockers.

The #1925 offers all the same qualities as our classic #1902, but also allows for supervisory key control that can override the combination. The stainless-steel body, hardened steel shackle, and supervisory access make this lock a widely used and highly dependable lock for whatever your locker needs.

1902

1925
