

Zephyr Lock

BETTER SECURITY THROUGH INNOVATION

Model 6510 & 6515 Professional Series Mechanical Shared Use Locker Lock System

Security and aesthetics come together in our 6510 and 6515 Mechanical Push Button Locks. These locks allow for secure and effective shared locker use in facilities such as gyms, fitness centers, and more.

Designed and engineered with the user experience in mind, the 6500 series has a unique push-button design for improved user feel. The recessed mounting allows for a very clean, low-profile appearance on wood, laminate, and phenolic lockers.

The 6500 series models are available in vertical and horizontal versions to further meet your application requirements, and if you are looking to upgrade down the line, the mounting cutout allows for interchangeability with the Pro electronic version of the locks.

FEATURES:

- Shared use operation allows users to create their own code
- User code is cleared after opening, allowing locker to be used by multiple individuals throughout the day
- 10-digit keypad for a wide variety of combinations to keep items secure
- Recessed mounting for very clean low-profile appearance on wood, laminate, and phenolic lockers
- Control key allows supervisors to access lockers and clear codes
- Updated push button design for improved user feel and higher level of security
- Works with both left and right hinged doors
- Available in both vertical (6510) and horizontal (6515) versions
- Mounting brackets available for use on $\frac{1}{2}$ " and $\frac{3}{4}$ " doors
- No batteries required for a maintenance free solution
