

Zephyr Lock

BETTER SECURITY THROUGH INNOVATION

Model 1930, 1954, 1992 & 1970 Series Built-in Combination Locks

Zephyr Lock's combination locks are secure, versatile, reliable, long-lasting, and cost-effective, making them ideal for applications that require a long-term single user lock that allows supervisory access. Our built-in combination locks are available in both left-hand and right-hand versions. Additionally some are offered in top- and bottom-hinged versions. We offer these variations to give our customers maximum flexibility.

1930/1931 SERIES VERTICAL DEAD BOLT LOCKS

This classic combination lock is durable, secure, and easy to use. End users simply need to shut their locker and their items are protected.

EASY TO USE: Lockers lock automatically upon closing

ADVANCED PROTECTION: An ergonomic dial, complete with a grip ring and non-slip coating, is standard for ease of use. Locks even when overstuffed, thanks to patent pending technology

EASY INSTALLATION: Simple

design and nut channels make installation a breeze

EXTENDED WARRANTY: 10-year warranty comes standard

ADA COMPATIBILITY: Available in ADA compliant models

1954/1955 SERIES SPRING LATCH LOCKS

This lock has a longer lifetime than your average lock. The Spring latch design automatically locks when a door is closed and it also has an ADA compliant version.

EASY TO USE: Lockers lock automatically upon closing

ADVANCED PROTECTION: An ergonomic dial, complete with a grip ring and non-slip coating, is standard for ease of use. Locks even when overstuffed, thanks to patent pending technology

EASY INSTALLATION: Simple

design and nut channels make installation a breeze

EXTENDED WARRANTY: 10-year warranty comes standard

ADA COMPATIBILITY: Available in ADA compliant models

SLEEK LOOK: Available with brass escutcheon plate

1992 LINEAR LOCKING BUILT-IN COMBINATION LOCK

This lock is engineered to comply with new high-security single-point locker designs. Its linear locking mechanism is more secure than the traditional spring latch and is more resistant to being locked accidentally.

SECURITY: Linear locking mechanism is more secure than traditional spring latch

ADVANCED PROTECTION:

An ergonomic dial, complete with a grip ring and non-slip coating, is standard for ease of use. Locks even when overstuffed, thanks to patent pending technology

EASY INSTALLATION: Simple design and nut channels make installation a breeze

EXTENDED WARRANTY: 10-year warranty comes standard

1970/1971 SERIES DEAD BOLT LOCKS

This lock is similar to Master Lock's 1670/1671 and is incredibly secure, versatile, and durable. It is a great fit for diamond perforated lockers, but is designed to fit almost all locker styles.

SECURITY: Deadbolt lock for extra security

VERSATILITY: Fits all locker styles, including left-, right-, top-, and bottom-hinged lockers

ADVANCED PROTECTION: An

ergonomic dial, complete with a grip ring and non-slip coating, is standard for ease of use. Locks even when overstuffed, thanks to patent pending technology
