

Zephyr Lock

BETTER SECURITY THROUGH INNOVATION

Model 6200 Professional Series Electronic RFID Locker Lock System

The Zephyr 6200 Series are our most innovative shared-use electronic keypad locks designed to provide high security and advanced features for employee locker rooms, recreational facilities, country clubs, and fitness centers. Designed and engineered with the user experience in mind, the 6200 series has a unique push-button design for improved user feel. The recessed mounting allows for a very clean, low-profile appearance on wood, laminate, and phenolic lockers.

The 6200 Series locks have a simplified user interface with multiple access options by use of keypad, RFID card, fob, or wristband. Supervisory access is available by both Control key and RFID cards to ensure facilities maximum control of their locker systems.

FEATURES:

- Antimicrobial option available for added protection and safety
- Utilizes MiFare Classic 13.56Mhz with multi-layer encryption for high security
